

Web UI Developer with 8 years of experience in front-end development, specializing in Angular. Extensive expertise in process improvement and technical analysis. Skilled in migrating and maintaining legacy systems as well as implementing scalable solutions. Quick to adapt to any programming language and/or methodology to solve problems and achieve project goals.

Career History

Globalant

Web UI Developer at Royal Caribbean

Participated in maintaining and improving various applications, including those developed in ReactJS, Angular, and WordPress. Implemented code improvements with SonarQube guidance. Increased unit test coverage.

Web UI Developer at Warner Media - Tower HBO

Proposed and implemented the base architecture of the project to replace the legacy code. Created a library of web components in Angular 11 used in the legacy code, speeding up the migration process. Built a scalable SASS code base following the design system provided by UX. Assisted with the migration of the Tower app from AngularJS to Angular 11.

Web UI Developer at Realogy - Desk

Proposed and implemented the division of the app into modules to improve loading times. Raised unit test coverage to 90% across all code using Karma and Jasmine. Assisted in constant updates of the Angular core, from Angular 4 to Angular 6 and later to Angular 8.
